

# AccuMark® MTM

In an environment where items are custom made to an individual's unique style and measurements, it's important to provide the perfect fit garment as quickly as possible.

Gerber's AccuMark Made-to-Measure (MTM) meets the complex needs of the tailored clothing industry. It is the only software solution that provides true automation from pattern modification through advanced rule based specifications and order creation.

## Create custom orders for a perfect fit.

### Maximize throughput of highly tailored garments.

- Alters model based on an individual's style choices and measurements.
- Uses measurements derived from high-tech 3D body scanners or low-tech tape measures.
- Creates AccuMark orders, models and size codes based on unique customer requirements.
- Features a customizable database to meet your unique product requirements and maximize throughput without need for additional personnel.

### Reduce time to market.

- Automates order selection and decision-making using powerful knowledge-based rules.
- Automates the "blue pencil" process.
- Batch processing of work automates and expedites work in progress.
- Generates and exports cut data automatically.
- Combines with AccuNest™ for automated marker making to maximize productivity and material savings.

### Simplify your business processes.

- Provides information management tools for querying orders by customer name or any other order detail.
- Expert software decreases reliance on highly skilled operators.
- Imports order information from various sources, including mainframes and web pages.
